

PRODUCT DATA SHEET JINHAI R6618(T)

JINHAI R6618(T) is a Zirconia, Alumina and organic treated rutile titanium dioxide pigment produced by the sulfate process. This designed to give average particle size distribution, good whiteness, good gloss, good dispersion, good hiding power, It is a highly durable, versatile pigment suitable for a wide range of applications.

Applications

Solvent-based coatings and water-based coating
External & internal architectural coatings
Industrial coatings
Ink
Leather
Paints
Plastics & Rubber

Product Characteristics

Good whiteness
High opacity
Good gloss
Good dispersibility

Properties

Surface treatment	Alumina, Zirconia
TiO ₂ content	≥93%
Oil absorption	≤20g/100g
PH	6.0~8.5
Specific gravity	4.1
Bulk density	900kg/m ³
Color Index	Pigment White 6 (77891)
CAS number	13463-67-7

The data in this publication is not a specification. The information in this data sheet is a general guide to the properties. No warranty is given or to be implied in respect of such information. In every case, it is the responsibility of the user to determine the applicability of the information and recommendations and the suitability of the products described for its own particular purpose.

PACKING AND STORAGE

25KGS bags and bulk bag; Keep it in dry and cool place.
